Mr. Phil Garcia
Ryangolf Corporation
772 South Military Trail
Deerfield Beach, Florida 33442

Dear Phil:

As the renovation at Forest Glen Golf & Country Club in Naples, Florida, comes to an end and the club's members start arriving back for the season, I wanted to express my deepest gratitude to you and your team. The transformation that has taken place over the last 30 weeks is absolutely remarkable.

This renovation had some obstacles along the way, but the biggest hurdle was the timeline. Many members questioned if the proposed timeline was feasible, and the efforts by Ryangolf proved that it was. Your dedication and commitment to complete the job on time is truly appreciated. Beyond finishing on time, the entire project was done to the highest quality. It is so easy to cut corners as the end nears, but your team sprinted through the finish line. It should also be mentioned Ryangolf's efforts beyond the finish to assist the club with the damage from Fay. As a team we have all preformed a miracle for our client.

Above all else, it has truly been a pleasure to work with Mike Pineda. As job superintendents go, he has been the most professional, most accommodating, and most enjoyable to work along side with. At each one of our site visits he was there on time, prepared, and ready to walk. His representation of Ryangolf is very commendable and I personally look forward to continuing our partnership at Wyndemere Country Club next summer with him in charge.

Even though I have been exposed to this industry for only seven years, it is easy for me to recognize that Ryangolf is a strong company. I have been very impressed with everyone that has represented your company from the first estimates to the last green being grassed. This entire experience has been a lot of fun and very rewarding because of Ryangolf.

I hope this note can somewhat explain my gratefulness with Ryangolf's efforts. It is companies like yours, and people like Mike that make our jobs a lot easier and make us look a lot better.

Sincerely,

Joel Hornickel
